Why are **surfactants** bad?

Surfactants act as detergents allowing oral care products to foam.

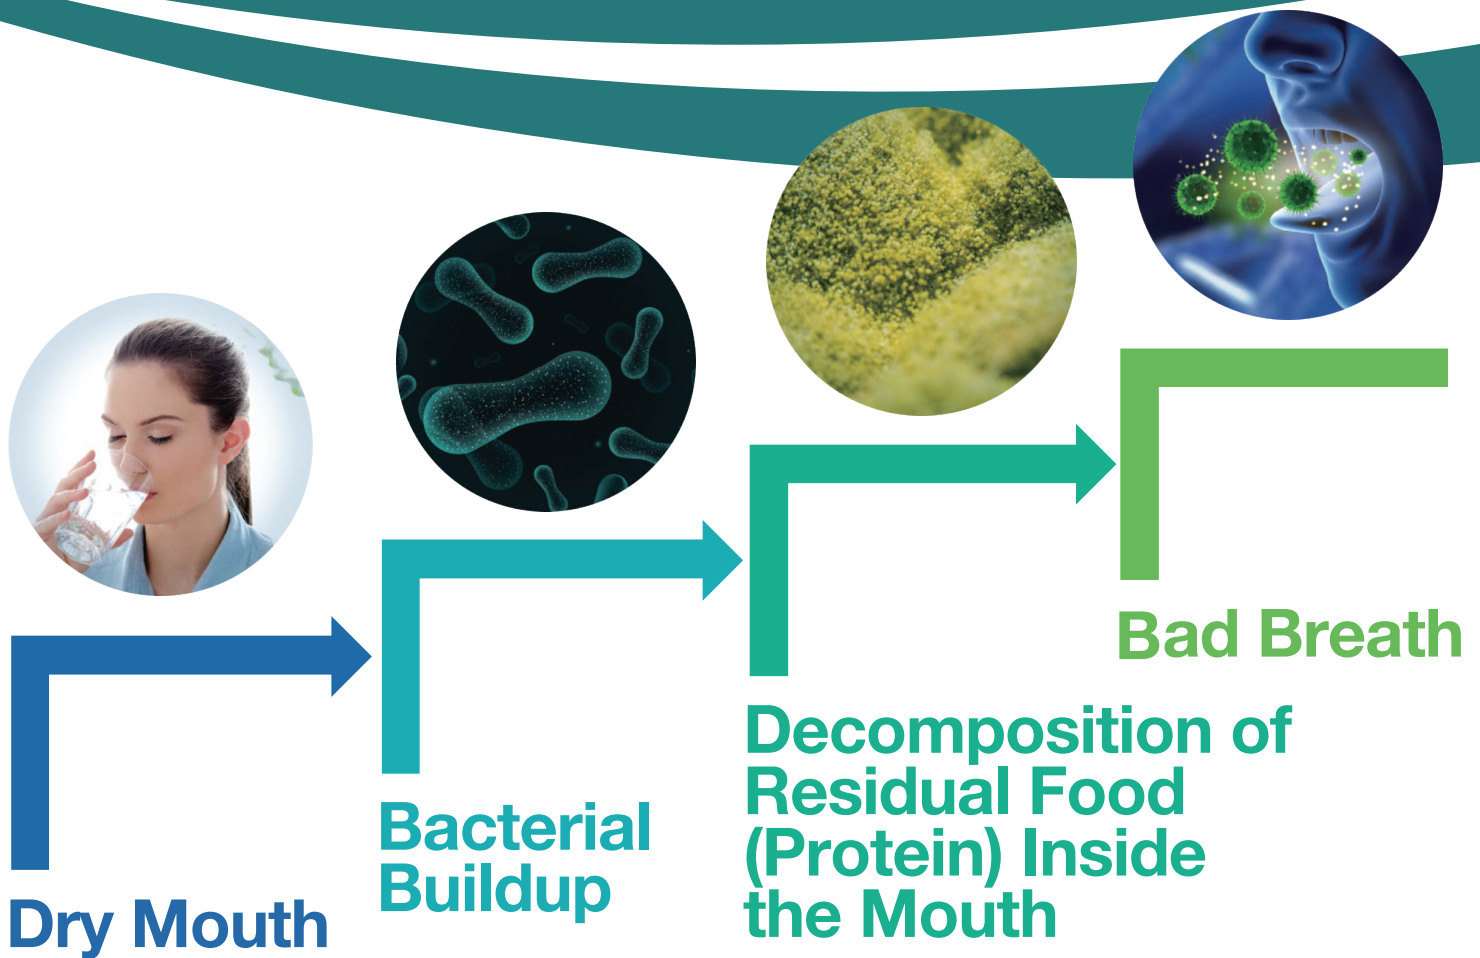

High content of surfactant may cause **oral irritation!**

No Surfactants!

Did you know what **causes bad** **breath**?

Bad breath is caused by bacterial buildup and the decomposition of residual food inside the mouth. Sulfur is one of the byproducts of such a chemical reaction, which smells like rotten eggs.

Oral bacterial buildup is exacerbated by dry mouth.

Key of Technology for Reduce Bad Breath

- * Truwell removes any leftover protein content foods between teeth
- * Natural antibacterial substances chitosan and propolis
